

MultiQ Protection Removable Film

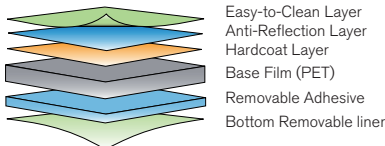

LCD screens are fragile and are easily damaged, which costs both time and money. The Protection Removable Film is an easy and cost saving way to protect your resistive screen from scratches and scuffs.

It is easy to apply the film on to MultiQ screens and it can be applied in any desired orientation since it has no directional characteristics in the x-y axes. The non-sticky film contains a bottom removable layer that makes it easy to remove without leaving any residue on the screen. The Removable Protection Film has a multilayer construction which not only protects the

screen from damage and reducing unwanted reflections it also increasing contrast for improved clarity and readability.

The top layer is an easy-to-clean layer which makes it easy to wipe away markers and fingerprints and there is no visible coating degradation with exposure to acetone, motor oil, soda or permanent marker and it repels ink marks so they wipe away easily. Even though the film is robust to protect the under laying substrate it have a minimal effect on touch screens sensitivity.

MultiQ offers Protection removable film for resistive touch screens in sizes from 12 to 19 inches.

The unique multilayered construction reduces glare, makes it easier to wipe off fingerprints, and helps shield screens from scratches and serious damage.
